

Total Security Solutions

SECURE ACCESS FOR YOUR ENTIRE FACILITY

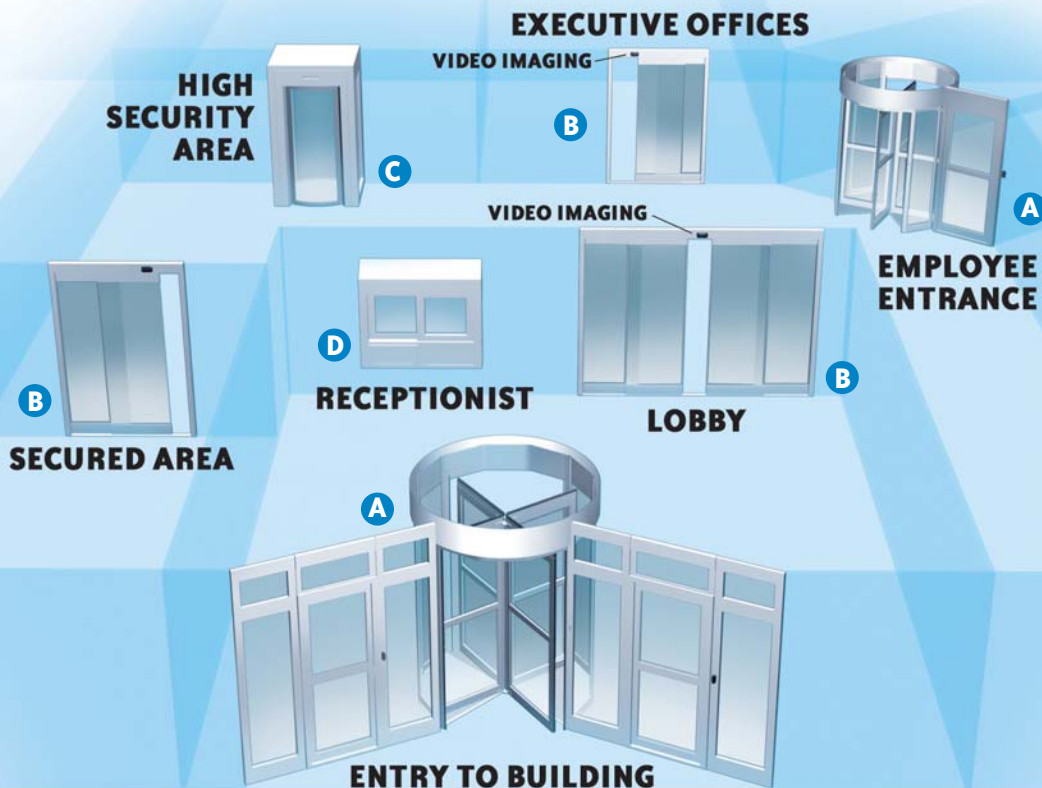

With Horton Automatics, you don't have to sacrifice accessibility for safety. We are the leader in secure access solutions.

SOLUTIONS

Horton Automatics has been providing innovative security solutions to the retail and commercial buildings market since the early 1980's. We have continued to expand our product offering to keep up with the changing demands of the market. Horton Automatics offers the most comprehensive line of products designed to maximize the protection you can provide your customers and employees.

Access Solutions:

- A** ControlFlow™ Revolving Door with ADA Swing Doors
- B** Sliding Door with Autolock and Secure Access
- C** Automatic Security Portal
- D** Security Window

Total Security Solutions

Automatic Transaction Security Window

Creates a secure barrier between the attendant and the customer. This gives the attendant the choice of direct contact with the customer through the automatic sliding window or the added security of using the transaction drawer to exchange items.

Automatic Swing Door with Electric Strike or Magnetic Locks

ADA compliant, automatic swing doors offer convenient access. By adding an electric strike interface or magnetic locks, these doors can be secured from general traffic, released remotely or by card access.

Automatic Slide Doors with Electric Locking

Adding auto locks to either a single or bi-parting slide door gives you an

added level of security by controlling traffic and limiting access.

ControlFlow™ Security Revolving Doors

ControlFlow™ doors offer two types of access control; Directional Security – permits free access in one direction but prohibits or restricts usage in the other. Card Access Security – offers greater flexibility, allowing control of access in one or both directions. Owner has the option to select automatic day use and night security.

Automatic Security Portal

The Horton Automatics Security Portal provides maximum security with built in metal detection, weight sensing, and interlocking doors. Recommended for the most demanding security applications designed with simplicity and ease of use.

Application	Security Window	Swing Door with Electric Strike or Magnetic Locks	Slide Door with Electric Locking	Security Revolving Door	One-Way Security Revolving Door	Security Portal
