

Airport Security Solutions

SECURE ACCESS FOR YOUR ENTIRE FACILITY

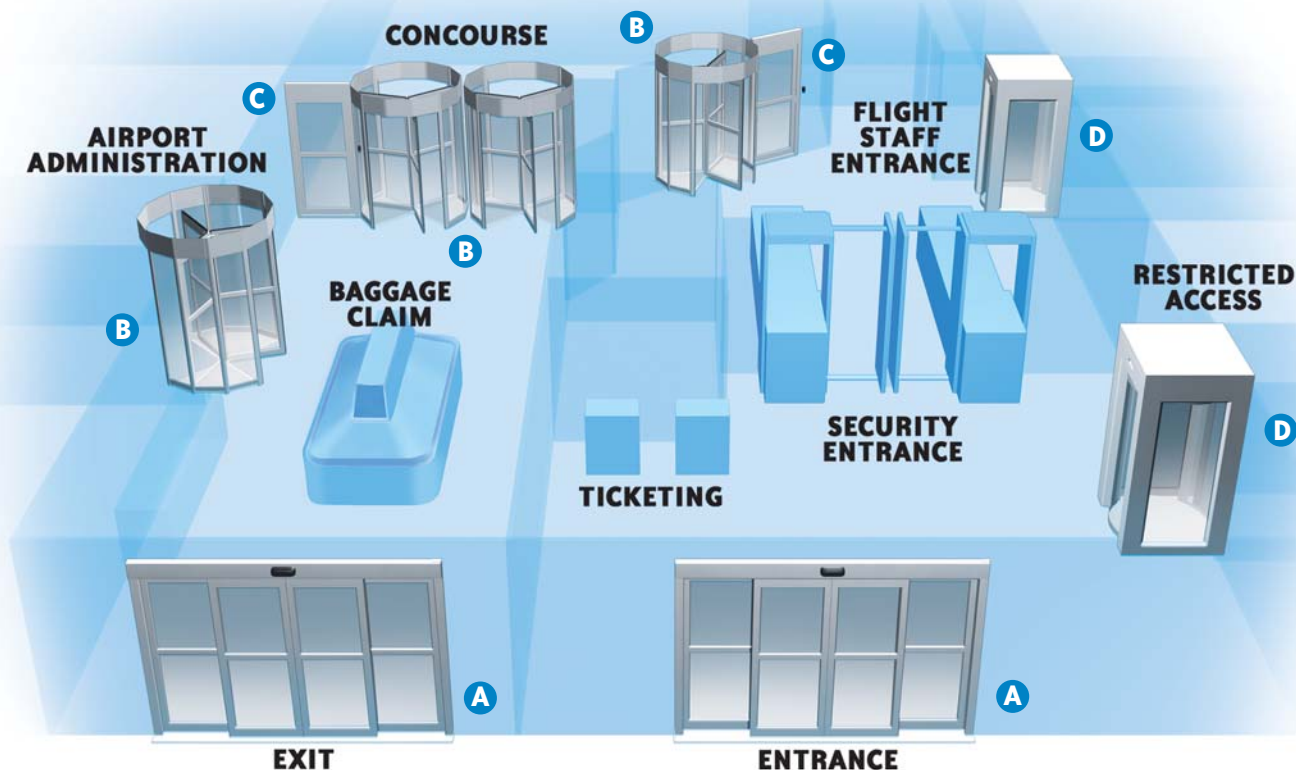

Horton Automatics has an integrated family of security door systems for your entire airport facility.

How Secure Is Your Airport Facility?

These days, a single security breach can shut down an airport for hours – costing countless hours of downtime. That's why it's more important than ever to have a comprehensive security solution.

Access Solutions:

- A** Automatic slide door with electric locking
- B** ControlFlow™ Security Revolving Door
- C** ADA swing door with electric strike or magnetic lock
- D** Automatic Security Portal

Airport Security Solutions

ControlFlow™ Security Revolving Doors:

Offers two types of access control: Directional Security – permits free access in one direction only. (Ideal for access to baggage areas and all areas where restricted access is needed.) Card Access Security – offers greater flexibility, allowing control of access in one or both directions. You have the option to select automatic day use or night security. Biometric sensors (iris, fingerprint, etc.) and visual ID can also be added for greater security.

Automatic Swing Doors

With Electric Strike Or Magnetic locks:

ADA compliant, automatic swing doors offer convenient access to buildings and areas. By adding an electric strike interface or magnetic locks, these doors can be secured from general traffic, released remotely or by card access.

Automatic Slide Doors With Electric Locking:

Adding auto locks to either single or bi-parting doors gives you an added level of security by controlling traffic and limiting access.

Automatic Security Portal:

Bullet-resistant glass and steel construction provides maximum security with built-in metal detection, weight sensors, and interlocking doors. Ideal for the most demanding security applications while maintaining simplicity and ease of use.

Platform Screen Doors:

Offer the utmost in security and safety. The PSD system communicates with the transit system to insure against false openings and premature closings.
